- Required internship
- Possible job titles:
  - Patient Care Services Administrator
  - Medical Office Manager
  - Human Resources Associate
  - Pharmaceutical Sales Representative
  - Nursing Home Administrator
  - Community Health Manager

## WELCOME

It is my honor and pleasure to introduce you to the University of Central Florida (UCF). At UCF, we are energetic. We are bold. We are big. Our size allows us to lead innovating change, and transform more lives. Our unique educational model that integrates strong academics with authentic learning opportunities is extremely well suited to meet the evolving needs of today's student and the world in which we live.

Students are supported throughout their UCF Online academic careers by a Success Coach, from admission through graduation. UCF Online programs are designed and taught by the same faculty who teach classes on our campuses. UCF is committed to this model, and our students benefit from it.

Health services administrators are health care professionals who play an important role in managing public health systems, health care systems and hospital networks. They are typically responsible for budgeting, accounting, human resources, marketing and training. Health care administrators ensure that health care facilities and health systems are running smoothly so that the highest quality of health care can be delivered.

UCF's Health Services Administration bachelor's degree is analogous to a business degree in many ways, and it is designed to educate future health services administrators and health care managers on how to effectively plan, direct and coordinate the delivery of health care. Our undergraduate program will also prepare students for an advanced degree in health services administration or other related disciplines.

Our students transition seamlessly from their classes to applied work environments from experiences gained at UCF, and begin making big impacts. College of Community Innovation and Education faculty, staff, students, alumni, and partners are committed to transforming education to take full advantage of meaningful learning opportunities gained from a UCF Bachelor of Science in Health Services Administration degree. We welcome you to join us as we unleash the potential our students, our communities, and the world.

Best regards,

Mark E. Bush, DHA, MBA  
Program Director
