UNLEASHING POTENTIAL
BECOMING THE UNIVERSITY FOR THE FUTURE

2022-2027 STRATEGIC PLAN
UNIVERSITY OF CENTRAL FLORIDA
Visit any one of UCF’s campuses, and you are sure to be inspired. You might hear first-generation students describe their journeys to higher education, or listen to faculty members reveal pivotal research discoveries. You are likely to witness staff members go above and beyond to encourage a student’s well-being, or revel in the optimism of a student entrepreneur who recently launched a new venture. Our campus community is rich with thinkers, doers, creators, innovators, healers, and leaders who are discovering and realizing their potential as Knights.

UCF is one of the most innovative universities in the country, inspired by boundless optimism — unencumbered by legacy structures, systems, and beliefs that constrain the true potential of people and institutions. We are emboldened in our pursuit of excellence and steadfast in our commitment to access and opportunity. And we believe strongly that potential exists in every individual and organization.

The university was founded in 1963 to provide talent and research insights in support of America’s quest to put humans on the moon and explore the far reaches of our galaxy. At the time, such endeavors were largely beyond collective imagination. Yet, we were dedicated to unleashing the potential of our students, faculty, and staff and committed to making the impossible inevitable.

Nearly sixty years later, we remain committed to unleashing potential in people, organizations, ideas, and the communities we serve. That charge inspires us and illuminates fantastic possibilities ahead.

As the University for the Future, we aspire to be innovative in higher education and among the most impactful universities in the country. We seek to be excellent in our teaching, research, and creative activities, while also providing access and opportunity to a diverse and dynamic student population. We will be elite — without being elitist. We can be the No. 1 provider of talent in Florida, and at the same time provide a high-impact and personalized student experience. We expose our students to the most cutting-edge research, while preparing them with practical skills that align with our region’s workforce needs. We will be distinctive in our areas of expertise, while working collaboratively to address the world’s most challenging problems.

We are grateful for the many people on our campuses and in the Central Florida community who contributed to the development of this plan. Many more will be needed to see it through, and we invite you to join us on this exciting and aspirational journey.

There is a great potential in our students, faculty, staff, and community. Let’s unleash it, together.

As always, Go Knights. Charge On.
UCF's students, faculty, staff, alumni, and friends have always been optimistic thinkers and innovators focused on the possibilities of the future. The university's collective achievements are the result of the effort and dedication of our students, faculty, staff, and partners. They will continue to be our greatest assets as we focus on excellence in all that we do.

**BUILT BY PARTNERSHIPS THAT FUEL THE TALENT PIPELINE**

The University of Central Florida (UCF) was founded in 1963 by a visionary group of Central Floridians who advocated for UCF's establishment, expecting it would become a university recognized for delivering high-quality education and industry-leading research, while fueling population growth and economic prosperity. Orlando's hometown university soon emerged as a comprehensive, metropolitan research university with internationally recognized programs in engineering, science, healthcare, hospitality, education, public service, and the arts.

UCF currently serves more than 70,000 students seeking undergraduate, graduate, and professional degrees in 13 colleges, four campuses, 11 satellite locations, and accessible digital learning modalities that reach students around the world. In recent years, we have expanded student access, broadened learning pathways, and extended our physical and digital footprints in support of business migration and population growth in Florida. Our student body, faculty, and staff — reflective of the future of Florida and America, composed of diverse, entrepreneurial, creative, and community-minded innovators — have helped develop innovative academic and research programs that change the world.

UCF is located in the 23rd-largest and fourth-fastest-growing metropolitan region in the United States. Central Florida is best known for tourism and entertainment, but the region is also a leader in aerospace, defense, advanced manufacturing, digital arts, optics, lasers, photonics, and related industries. UCF campuses are in proximity to the Kennedy Space Center; several Fortune 500 companies; dynamic, high-tech industry clusters; and a vibrant entrepreneurial ecosystem fueled by startup ventures, public-private partnerships, and transformative technologies. UCF is woven into the fabric of the Central Florida community and has embraced the region's youthful and welcoming spirit. Our mission is intertwined with the region's growth and prosperity, as Orlando’s cultural and economic maturity parallels our own.

UCF’s unique and fervent commitment to student success, access to opportunity, and excellence has attracted some of the most innovative and productive scholars in the world. UCF earned its reputation and ranking as one of the most innovative universities in the country. With student success and social mobility outcomes comparable to the world's top institutions, and several world-class research and academic programs, UCF amplifies the uniqueness, quality of life, and economic vitality of Central Florida.

With a commitment to accessible learning pathways, we were able to reduce achievement gaps among students from all walks of life, revealing the power of education to unleash the potential we know exists in each person. Today, UCF graduates the third-highest number of students of color in the nation and enrolls nearly 22,000 Pell Grant eligible students each year, 69% of whom complete a post-secondary degree — well above the national average. We have contributed significantly to Central Florida’s growth by building productive community and industry partnerships, supporting the region’s evolving talent pipeline, and conferring more than 390,000 degrees — most within the last two decades.

**MADE POSSIBLE BY OUR PEOPLE**

UCF’s students, faculty, staff, alumni, and friends have always been optimistic thinkers and innovators focused on the possibilities of the future. The university’s collective achievements are the result of the effort and dedication of our students, faculty, staff, and partners. They will continue to be our greatest assets as we focus on excellence in all that we do.
PLANNING CONSIDERATIONS

The university’s success notwithstanding, we find ourselves at an inflection point. Several sources of disruption are challenging the financial sustainability of colleges and universities as the fundamental context of education has changed.

The COVID-19 pandemic disrupted traditional norms in higher education, fostered new expectations for how people learn and work, and altered the discovery and dissemination of knowledge. The pandemic also revealed the need for universities to confront the viability of their business models and the effectiveness of traditional operating systems. There is increasing scrutiny on the value of postsecondary education and a greater need, interest, and demand for flexible and customized learning options. These trends are shaping how we recruit, retain, and develop students, faculty, and staff; how knowledge is developed and applied; and how students, alumni, and partners engage with the university.

For the last 25 years, UCF’s progression was fueled largely by steady, continual, uninterrupted enrollment growth, which allowed us to expand our mission and reach while improving the quality of the student experience. However, as growth accelerated, our systems, infrastructure, resources, and operating processes did not keep pace. Although UCF provides an outstanding return on investment in terms of student outcomes, we will need additional faculty and staff, enhancements to our facilities and physical plant, and upgrades to our IT infrastructure to meet the evolving demands of our students and investors.

Concurrently, there are extraordinary opportunities for social, cultural, and economic development in Florida. In the last decade, Florida became the third-most populous state in the U.S. and is projected to be the world’s 10th-largest economy by 2030. As the state’s population has grown, there are prevailing, unfilled workforce needs in Orlando and throughout Florida, particularly in healthcare, technology, and professional services. More significantly, sectors such as aerospace, aviation, finance, healthcare, life sciences, logistics, transportation, renewable energy, and advanced manufacturing will fuel wage growth and sustained economic development in the state. These are areas where UCF has experience, expertise, capacity, and demonstrated capability.

To seize this moment of opportunity and in anticipation of continual changes in higher education, we will invest in our strengths; focus on research excellence in areas of opportunity; increase and diversify our revenue and resource base; institutionalize sustainability and resilient operations; align learning experiences with the workforce demands of our region; and innovate the delivery of higher education to enrich the student, faculty, and staff experience.

OUR FOCUS REMAINS CLEAR

BECOMING THE UNIVERSITY FOR THE FUTURE

contribute to the development of an educated citizenry, unleashing the potential of our entire campus community.
The goals and priority initiatives listed in this plan are organized by **four priorities** and are the most important next steps to move UCF toward a Top 50 ranking and a “preeminent” designation in Florida’s Preeminence Program, which is designed to elevate the academic and research excellence of the state’s highest-performing universities. Goals and initiatives for a Top 25 ranking and AAU-eligibility extend beyond 2027.

### 1. Student Success and Well-Being

At UCF, we believe that our mission and fundamental purpose is to identify and unleash an individual’s potential by making high-quality, post-secondary education affordable and accessible. Our efforts to accelerate student success and enhance well-being will contribute to an educated citizenry by developing students who are culturally competent; prepared to lead enriched and fulfilling lives; and have the knowledge, skills, and aptitudes that align with the workforce of the future.

### 2. Discovery and Exploration

UCF’s knowledge enterprise is an essential driver of the region’s economic vitality. We plan to invest in our research infrastructure in ways that address prevailing workforce needs in the state, accelerate the development of industry clusters, attract new companies and high-wage jobs to Florida, support the formation of entrepreneurial ventures, guide evidence-based policies, encourage creative activity, and advance the state’s objective to be the 10th-largest economy in the world.

### 3. Community and Culture

UCF aspires to be a destination of choice for the most talented people, a best place to learn and work, and a partner of choice in our community. We continue to foster a culture of innovation, inclusion, public service, and collaboration and will be a model for civil discourse, consistent with the Florida Board of Governors’ Statement of Free Expression.

### 4. Innovation and Sustainability

UCF is one of the nation’s most innovative universities. We seek to institutionalize resiliency and maintain financial and operational sustainability by diversifying our resource base and continually practicing visionary and pragmatic stewardship of our assets and obligations.
Student Success and Well-Being

</tr>
</tbody>
</table>

Note: *STARS = Sustainability Tracking Assessment and Rating System. **USNWR = U.S. News & World Report
Our investments in health and human performance will address prevailing workforce needs in the healthcare sector; encourage distinctive and high-impact research; encourage collaboration between our Academic Health Sciences Center and healthcare providers; and integrate contributions from an eclectic set of disciplines, such as nursing, medicine, population health, biomedical and life sciences, psychology, simulation, engineering, counseling, education, communications, the arts, and humanities.

There is significant public and private sector investment in space exploration and the development of a vibrant, low-Earth orbit economy. Our focus on space technologies and systems will capitalize on UCF’s distinctive history as the Space University; our unique research facilities; and insights from disciplines such as engineering, photonics, physics, chemistry, geology, ethics, philosophy, biology, health, medicine, modeling and simulation, psychology, business, economics, communications, political science, and education.

As a premier destination for tourism, entertainment, and the arts, Central Florida provides an unparalleled landscape for immersive experiences that allow people to interact in dynamic ways with real or imagined environments. UCF’s focus on entertainment and themed experiences will encourage the development and utilization of dedicated spaces that integrate our expertise in simulation, digital gaming, human computer interface, augmented and virtual reality, hospitality, education, business, and the arts.

A new energy future is essential for sustainability of life as we know it. We seek to extend the nearly 250 ongoing energy-related research projects currently funded by government and private industry; continue operating our campuses and facilities with resilience and sustainability; and advance energy research by integrating knowledge from disciplines, including environmental science, public policy, business, optics and photonics, engineering, computer science, modeling and simulation, communications, and education.

A focus on transformative technologies and national security will address two related concerns: 1) the prevailing digital transformation of industries and organizations; and 2) the U.S. Department of Defense’s demands for new operational concepts, increasingly joint operations, and emerging science and technology trends. We seek to increase research activity in support of national security and technology integration, invest in infrastructure to perform classified and sensitive work, and accelerate technology development.
### MEASURING OUR SUCCESS

**Notes:**
1. 2022 Accountability Plan.
2. Preeminent University Metric.
4. Undergraduate research, learning communities, internships, global learning (i.e., study abroad), and designated and capstone courses.
5. Faculty FTE from the Common Data Set (CDS).
6. Percentage of faculty answering “satisfied” or “very satisfied” in response to CSACME survey item # 2508, “Indicate the extent to which you are satisfied with UCF as a place to work.”
7. Percentage of staff answering “agree” or “strongly agree” in response to UCF’s Campus-wide Culture and Climate Survey item, “I am satisfied overall with my interactions with other employees.”
8. Sustainability Tracking Assessment and Rating System.
Since its founding, UCF has proven that it has the capacity to realize a strong return on investment. We do this by delivering “Top 50” overall student outcomes with faculty and financial resources that rank below 350 nationally by U.S. News & World Report. UCF has been recognized as one of the “most innovative” and “best value” public universities, but as we remain committed to delivering efficient results and improving student and research outcomes, new recurring and non-recurring resources are needed to fuel our pursuit of international recognition and world-class academic programs. Because a vision without resources is hallucination, the university will focus on optimizing our existing operations while also generating new resources to support the priorities set forth in this plan.

The university is currently in the process of implementing a new, cloud-based enterprise resource planning system, a service center for finance and human resources operations, and a “responsibility center management” budget model in the next fiscal year. These multi-year initiatives will transform the way the university operates in serving our students, faculty, and staff by increasing the effectiveness and efficiency of our administrative processes. Integrating these new systems will eliminate the wide variation in how services are currently performed; support the overarching mission of elevating research and education; and affirm our commitment to being a prudent steward of tuition, investor, and taxpayer dollars. These initiatives will also provide university leadership with the tools needed to align and deploy resources with strategic intent.

INVESTING IN EXCELLENCE

OPTIMIZE EXISTING RESOURCES

The university is currently in the process of implementing a new, cloud-based enterprise resource planning system, a service center for finance and human resources operations, and a “responsibility center management” budget model in the next fiscal year. These multi-year initiatives will transform the way the university operates in serving our students, faculty, and staff by increasing the effectiveness and efficiency of our administrative processes. Integrating these new systems will eliminate the wide variation in how services are currently performed; support the overarching mission of elevating research and education; and affirm our commitment to being a prudent steward of tuition, investor, and taxpayer dollars. These initiatives will also provide university leadership with the tools needed to align and deploy resources with strategic intent.

$150 MILLION OF RECURRING INVESTMENT BY 2027

As UCF begins to unleash our potential toward becoming the University for the Future, we will need to identify new sources of revenue while also redirecting existing resources toward our people, infrastructure, and facilities.

This funding plan includes:

$50 MILLION FROM EXISTING RECURRING FUNDS REDIRECTED TO STRATEGIC PRIORITIES BY 2027.

Through the creation of a strategic investment fund, the university has identified $23 million in recurring funds that can be redistributed to strategic priorities supporting the university’s academic mission. Implementation of strategic sourcing procurement practices and centralization of operating functions will reduce or eliminate duplicate costs, enable economies of scale, and allow for gains from mundane activities such as the utilization of unused purchasing discounts.

$100 MILLION OF NEW RECURRING FUNDING FROM DIVERSE SOURCES TO BE DIRECTED TOWARD STRATEGIC PRIORITIES BY 2027.

$50 million from additional allocations from the state
$50 million from revenue diversification and growth, including:

› Strategic enrollment planning to realize net incremental tuition revenue by extending access to varied learning modalities and by modifying the university’s mix of undergraduate, graduate, professional, out-of-state, and international students.

› An increase in the university’s endowment and current-use philanthropy for strategic initiatives and budget relief.

› Additional revenue and indirect cost recovery from funded research, contracts, grants, and auxiliary units.

› Revenue generated from partnerships of purpose that include collaborative grants, sponsored and applied research, scholarly consortia, research commercialization, and investment in the UCF brand.

$500 MILLION OF NON-RECURRING INVESTMENT BY 2027

To realize preeminence in the Florida State University System and eligibility for membership in the Association of American Universities (AAU), we will need to secure and invest resources to upgrade our IT infrastructure; enhance, optimize, and secure facilities to support expansion of our teaching and research enterprise; invest capital resources in the built environment for both infrastructure and building upgrades that create the reliability needed on a world-class research campus; and provide capital for enrichment of our areas of strategic focus.
Unleashing Potential articulates the vision, goals, and metrics that will focus UCF’s efforts to become the University for the Future. The plan sets direction and identifies high-level objectives — serving as the foundation for our launch of a coordinated implementation effort during the 2022-23 academic year.

Implementation of the plan will include:

- **Charging the University’s Strategic Planning Council**, composed of faculty, staff, students, and administrators, to develop an integrated implementation structure that encourages alignment among all aspects of the university — academic affairs, student affairs, business and finance, facilities, IT, communications, advancement, etc.

- **Creating work groups to support the progress of the plan’s priorities and strategic areas of focus.**

- **Coordinating with colleges and administrative units** to develop division-level plans that align investments and activities with the strategic plan’s goals and priorities.

- **Building reporting mechanisms and dashboards to track progress** of initiatives and investments advancing the goals of the plan.

- **Incorporating oversight and governance components** of the plan into the Board of Trustees’ annual workplan in collaboration with the Board Chair and committee chairs.
